

>> Path 1: Pre Security (New 2026)

<https://tryhackme.com/path/outline/presecuritylegacy>

Pre Security:

To attack or defend any technology, you first need to understand what powers it. Explore computer basics, write your first lines of code, and discover how networking, the web, and real world cyber attacks all connect. Your cyber security journey starts here!

Modules:

1. Introduction to Cyber Security
(<https://tryhackme.com/module/introduction-to-cyber-security>)
2. Network Fundamentals
(<https://tryhackme.com/module/network-fundamentals>)
3. How The Web Works
(<https://tryhackme.com/module/how-the-web-works>)
4. Computer Fundamentals
(<https://tryhackme.com/module/computer-fundamentals>)
5. Operating Systems Basics
(<https://tryhackme.com/module/operating-systems-basics>)
6. Software Basics
(<https://tryhackme.com/module/software-basics>)
7. Attacks & Defenses
(<https://tryhackme.com/module/attacks-and-defenses>)
