

Path 1: Pre Security (Legacy) > Module 4: Linux Fundamentals

<https://tryhackme.com/module/linux-fundamentals>

Linux Fundamentals:

Many servers and security tools use Linux. Learn how to use the Linux operating system, a critical skill in cyber security.

Linux is one of the major operating systems and is heavily used in organisations all around the world. Learning how to use Linux is a core competency and will help you in your hacking journey not to just use Linux-based security tools, but how to use and exploit the operating system. This module will focus on getting you comfortable using Linux.

Room 1: Linux Fundamentals Part 1

Embark on the journey of learning the fundamentals of Linux. Learn to run some of the first essential commands on an interactive terminal.

Room 2: Linux Fundamentals Part 2

Continue your learning Linux journey with part two. You will be learning how to log in to a Linux machine using SSH, how to advance your commands, file system interaction.

Room 3: Linux Fundamentals Part 3

Power-up your Linux skills and get hands-on with some common utilities that you are likely to use day-to-day!
