Pre Security (Legacy):

Cyber security is often thought to be a magical process that can only be done by the elite, and TryHackMe is here to show you that's not the case. Anyone, with any experience level, can learn cyber security and this Pre-Security learning path is the place to start.

Introduction:

This learning path will teach you the pre-requisite technical knowledge to get started in cyber security. To attack or defend any technology, you have to first learn how this technology works.

The Pre-Security learning path is a beginner friendly and fun way to learn the basics. Your cyber security learning journey starts here!
